Power connections	For “P1”, “P2”, “S2” and “S3” there is a socket at the bottom of the surface. For the area “P1” and distribution point “S2”, the socket is located directly below the surface on the floor and for “P2” and “S3” the socket is located 6 m from the area.
Access to WC facilities	Use public toilets.
Parking	There are no parking spaces available for the promoters. The public station parking lot must be used. No parking spaces can be reserved. Payment is made directly on site at the public rates.

Important sampling informations

- No objects may be placed within 60 cm of guidance systems for visually impaired persons.
- Underpasses and lower levels are subject to a maximum headroom of 2.00 m for branded sampling containers. Any damage to sprinkler equipment will have serious consequences, which will be charged to the agency or the customer.
- A maximum of 4 promoters per sampling point and one rollable container for the distribution goods per promoter are permitted. The rollable containers may have branding (incl. beach flag etc.).
- With the split sampling point «S1» you benefit from a larger distribution radius and thus from more customer contacts. The maximum number of 4 promoters remains, i.e. max. two per half sampling point.
